

DUPLI-COLOR 3D EFFECT**Technical Information**

Special transparent glitter painting for all kind of surfaces. The color is changing due to direction of light and point of view. The special effect you achieve depends strongly from color and quality of the surface. Best results will be achieved on dark ground, e.g. EFFECT PRIMER. For outside protection use ZAPON Spray.

Ord.-no: 888946

Quality & properties

- High-grade nitro-combi quality
- Transparent, therefore versatile use
- Very efficient
- Very high degree of gloss
- Excellent adhesion
- Good flow, smooth surface
- Quick-drying
- After coating with clear lacquer weather-resistant, light-proof, UV-resistant
- Scratch-, shock- and impact-resistant

Physical & chemical data

- Base: Nitrocombi resin
- Colourname: transparent
- Degree of gloss: gloss GU
- Efficiency: 150 ML – 0.6 m²
- Dry to touch: 30 min
- Dust dry: 10 min
- Completely dry: 12 min
- Overcoatable: 30 min
- Surfaces: glass, ceramic, stone, metals, wood and as well as all surfaces, which are painted with acrylic or nitro lacquers
- Minimum Working Temperature: 10 °C
- Maximum Working Temperature: 25 °C
- Flash point: n.a.
- Storage stability: 10 y
- Content: 150 ML

How to use

The ground has to be clean, dry and free from fat.

If necessary, apply a coat of paint

Best effect will be achieved on dark ground.

Cover areas not to be painted.

Before use, shake can for 3 minutes.

Test spray at an invisible spot.

Spray from a distance of approx. 30 cm several thin coats on the clean and dry surface, until the desired effect is achieved.

After 30 minutes overspray with DUPLI-COLOR Acrylic Clear Lacquer (e.g. Zapon-Spray).

A protective coat of clear lacquer is absolutely necessary to protect the glittering parts, to make the surface smooth and resistant and to give a durable gloss.

Do not spray over surfaces which are painted with synthetic resin lacquer!

Environmentally sound

European Aerosols is committed to apply formulations without restricted or critical ingredients and to achieve best possible performance. The caps and packagings are made of recyclable material.

Disposal

Only the completely emptied cans should be put into the recycling skip or appropriate container for reclaimable refuse. Cans which are not empty should be disposed off as "special refuse".

Marking/Labelling

All products made by European Aerosols comply with the actual labelling regulations according to Preparation Guideline 1999/45/EG. All aerosols correspond to TRGS 200 and TRG 300 as well as to aerosol guideline 75/324/EWG in the actually valid version.

As of May 7, 2025 – This release replaces all eventually earlier issued versions.
