#### How to use

- The ground has to be clean, dry and free from rust and fat.
- Absorbant surfaces have to be primed with Universal Primer.
- Mask off areas not to be painted.
- Before use, shake can for 3 minutes.
- Test spray at an invisible spot.
- Spray from a distance of 20 - 30 cm.
- Spray in 2 minute intervals several thin coats.
- Important: Due to technical reasons it is not possible to conserve the excellent high gloss. A coating with clear lacquer would etch the effect painting. The only possibility to renew the gloss is to apply a new coat of the effect spray.
