performance*

# NEXT

Innovative spray paint quality for a very convenient use and high reliability for perfect spraying results. The neutral smell combined with a low spraying mist allows even spraying in ventilated rooms. With the fast drying paint quality and a perfect adhesion on many surfaces even without a special primer, the DUPLI-COLOR NEXT offers various possibilities in decoration, DIY, arts & craft and even for artists.

OBJECTS FOR: INDOOR ★★★★★  
OUTDOOR ★★★★★

## That's why „NEXT“ makes that much fun while spraying

- Neutral smell without chemical appearance
- Easy application while universal compatibility with other paints
- Perfect adhesion on many surfaces without a primer
- Even for direct spraying on styrofoam and paintable plastics
- Soft spraying with elegant levelling of the paint
- Fast drying and perfect coverage
- Suitable for indoor and outdoor use
- Flexible top coat with good scratch resistance
- Biodegradable solvents for user friendly applications

# The special product advantages of the new DUPLI-COLOR NEXT

## Advantage 1: Alkyd + Acryl

This new spray paint based on an evolutionary resin technology combines the positive characteristics of alkyd and acrylic based spray paints into one. Alkyd sprays convince with high gloss and maximum surface flexibility. Acrylic sprays assure with special hardness, advanced scratch resistance and short drying time.

**NEW:** Therefore it allows spraying on former painted alkyd and acrylic surfaces!

## Advantage 2: Primer and paint

Due to the very flexible coating and increased adhesion power we unify with this new formulation in a 2-in-1 product: **primer and paint in one.**

## Advantage 3: Neutral smell + fast drying time

Low share of solvents which is even biodegradable, creates a nearly neutral smell – pleasant and user friendly – especially suitable for ventilated indoor applications. User-friendly even due to short drying time.

**TIPP**

Before spraying, clean and degrease the surface and use sandpaper to rough the surface. By doing this a very smooth surface should be possible.
